

A FRIENDLY REMINDER

Please remember, special care should be taken when loading **highly concentrated heavy loads** on trailers equipped with Rumber.

Loads that have a high concentration of weight distributed in small areas can damage or even break Rumber boards unless there is adequate reinforcement built into the supporting structure. Please contact us to help determine proper Rumber usage for questionable loads.

EXAMPLES OF LOADS NOT RECOMMENDED ON TRAILERS EQUIPPED WITH RUMBER

Compactors or Road Rollers

Scissor lifts

Forklifts
